Content

- **Features**
- **Benefits**
- **Easy to Implement**
- **Usability on Client-side**
- **New Features at a Glance**

Features

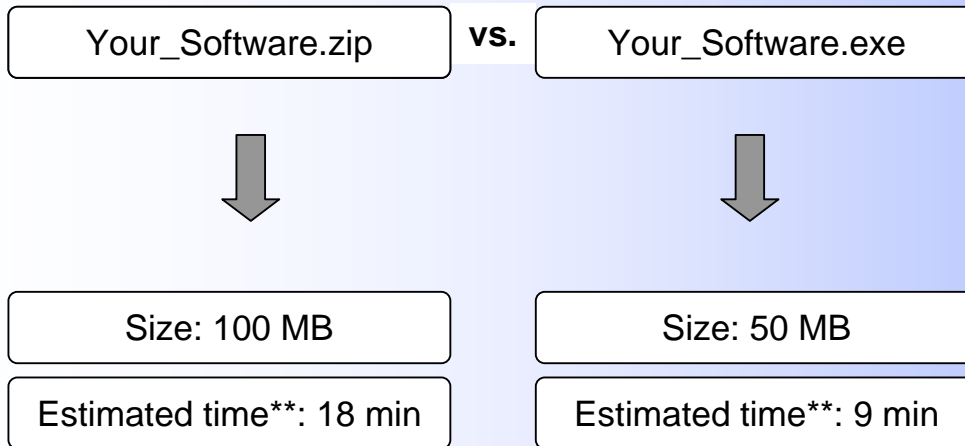

- File Size with normal (RAR, CAB, ZIP) compression
- File size with NOSSO® compression
- File size with NOSSO® Plus compression

- NOSSO® reaches unrivaled size reductions on any software application
- Reduction rates of 40-70% on already compressed data (e.g. ZIP, RAR, CAB)
- Outstanding reduction of download times and volumes
- Intelligent data provision and sophisticated data management
- Supports all platforms
- Self-extracting download file - No client application for re-composition (extraction) needed
- Seamless integration in existing install builder (and distribution) processes at your company

Benefits

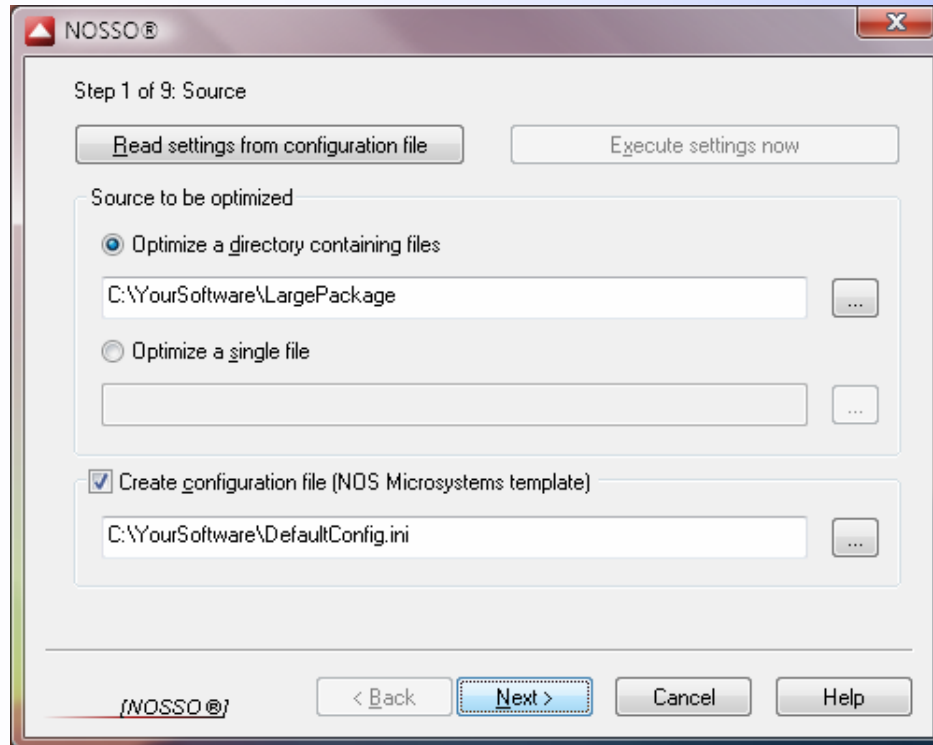

- Smaller downloadable versions of products
- Shorter, faster downloads for customers
- Increased circle of potential customers (also modem and ISDN users)
- Improved user experience
- Reduced bandwidth and traffic due to smaller size of product
- Reduced distribution costs for products
- Independent and fast creation of size-optimized product builds – Short time to market minor releases or content changes

Easy to Implement

- Our company provides easy-to-use, easy-to-integrate NOSSO® Programs, customized to specific software applications
- Using these tools, size optimization can be performed repeatedly and independently from NOS Microsystems
- We provide full maintenance and support
- Competitive pricing according to your specific usage type

Usability on Client-side - NOSSO® GUI

- Pause / Resume / Exit buttons for re-composition dialog
- No limitations in terms of design and content of user interface and all dialogs
- NOSSO® offers your company possibility to customize user interface and all dialogs in accordance with corporate design and installation dialog
- Less customer confusion and thus higher customer satisfaction through consistent design
